

Munyaradzi Chenjerai

Full Stack Web Developer • JavaScript | TypeScript | React | Node.js

Email: munya.chenjerai@example.com **Phone**: +61 4XX XXX XXX
Location: Perth, WA **Portfolio**: <https://munya.dev>
GitHub: <https://github.com/munya-dev> **LinkedIn**: <https://linkedin.com/in/munyaradzi>

Professional Summary

Resourceful web developer with ~5 years of experience building responsive, accessible, and performant web apps. Comfortable across the stack—from modern frontend frameworks to cloud-native back ends. I enjoy collaborating with designers, shipping iteratively, writing clean, testable code, and mentoring newer engineers.

Technical Skills

Frontend	React, Next.js, Redux Toolkit, Vue 3, Tailwind CSS, CSS Modules, Sass, HTML5, Webpack/Vite
Backend	Node.js, Express, NestJS, REST/GraphQL, tRPC, WebSockets, Serverless (AWS Lambda)
Databases	PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Sequelize
Testing	Jest, React Testing Library, Playwright, Cypress, Supertest
DevOps	AWS (S3, CloudFront, Lambda, API Gateway), Docker, CI/CD (GitHub Actions), Terraform (basics)
Tooling	Git, GitHub/GitLab, Storybook, Figma, Postman/Insomnia, PNPM/NPM/Yarn

Selected Projects

KoalaCart — A sleek, mobile-first e-commerce front end with real-time inventory and guest checkout | <https://koalacart.dev>

- Implemented a blazing-fast product grid with Vite + React, optimizing images and routes for sub-100ms TTI on cached visits.
- Built a custom cart state with Redux Toolkit and memoized selectors, reducing re-renders by ~40%.
- Integrated Stripe test mode and mocked shipping providers; added end-to-end tests with Playwright.

Stack: React, Vite, Redux Toolkit, Tailwind, Stripe (test), Playwright

OutbackMeals — Serverless back end for a meal-prep platform with scheduled jobs and webhooks | <https://outbackmeals.dev>

- Designed a GraphQL API with authentication, input validation, and rate limits; documented with GraphQL Playground.
- Implemented order lifecycle events via webhooks and SNS; added retries with exponential backoff.
- Used Prisma migrations and seed scripts to manage schemas across environments.

Stack: Node.js, NestJS, GraphQL, Prisma, AWS Lambda, API Gateway, SNS, DynamoDB, CloudWatch

WA Trails — Progressive web app for hiking trails with offline maps and caching | <https://watrails.app>

- Shipped installable PWA with Workbox strategies (stale-while-revalidate and background sync) for patchy reception.
- Implemented map clustering and lazy data hydration, cutting initial bundle by ~35%.
- Added accessibility features (skip links, focus management) to meet WCAG 2.1 AA.

Stack: Next.js, TypeScript, Mapbox GL JS, Workbox, PostGIS, Vercel

Professional Experience

Full-Stack Web Developer — DigiWorx Labs (Contract) (Feb 2023 – Oct 2025)

- Led a redesign of a B2B dashboard; introduced data virtualization for tables with 50k+ rows, improving render time by ~60%.
- Built a feature-flagged onboarding flow and A/B tested variants, raising activation by 13–18% (p<0.05).
- Set up GitHub Actions pipelines (lint, unit, e2e) and preview deployments; reduced lead time for changes by two days.
- Mentored 2 junior devs on React patterns, testing, and code reviews.

Stack: React, TypeScript, Node.js, Express, PostgreSQL, Redis, Docker, GitHub Actions

Frontend Developer — SkyHarvest (Jul 2021 – Jan 2023)

- Delivered a design-system-driven UI with Storybook and visual regression checks; reduced design debt.
- Implemented a real-time collaboration feature using a CRDT-like approach over WebSockets.
- Collaborated with UX to improve perceived performance (skeletons, optimistic updates, code-splitting).

Stack: Vue 3, Pinia, Vite, Tailwind, Node.js, WebSockets

Junior Web Developer — BrightByte Studio (Jan 2020 – Jun 2021)

- Built marketing microsites with accessibility and SEO best practices; shipped ~15 sites.
- Wrote integration tests and added CI checks to keep main branch green.
- Maintained internal component library and documentation.

Stack: React, Next.js, Sass, Jest, Cypress

Education & Certifications

B.Sc. (Hons) in Computer Science

University of Somewhere — 2019

AWS Certified Cloud Practitioner

Issued 2024 • ID: AWS-CLF-DUMMY

Meta Front-End Developer (Coursera)

Completed 2023

Open Source, Talks & Extras

- Contributor to [open-maps](#) and [awesome-a11y](#) repositories (issues, docs, small features).
- Lightning talk: “Accessibility wins that cost almost nothing” — local dev meetup (2024).
- Interests: trail running, home roasting coffee, sketch-noting, indie game jams.
